

Introduction to Hand Fitting/CNC Programming

Subject Type: Construction & Engineering

Course Overview:

Delve into essential safety guidelines and fundamental skills necessary for using a variety of hand tools and CNC Programming. Refresh or broaden your existing skills to learn how to safely use hand fitting equipment safely with this short 10-week course for adult learners.

What's Covered:

During this hands-on course, you will learn and practise essential hand fitting skills used in the engineering industry.

You'll work with tools such as files, hacksaws, taps, dies, and drills to accurately mark out, cut, shape, and assemble metal components.

This course is perfect for those interested in practical engineering or looking to gain a foundation in precision fitting techniques, this course focuses on accuracy, safety, and developing confidence with manual tools.

Entry Requirements:

No entry requirements

What else do I need to know?

The course will run over one night per week, giving students the ability to learn quickly through 1 to 1 teaching and group tasks.
